**DETAILED ACTION**

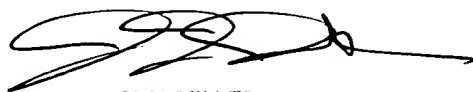

1. In view of the Appeal Brief filed on 14 October 2006, PROSECUTION IS HEREBY REOPENED. A new rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

A handwritten signature in black ink, appearing to read 'J. Miller', with a long horizontal stroke extending to the right.

***Response to Arguments***

2. Applicant's arguments, see Appeal Brief, filed 24 October 2006 have been fully considered and are persuasive. The prior art rejections of all pending claims have been withdrawn.

***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10, 33-36, and 46-50 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Independent claim 6 recites, "An article comprising a storage medium, the storage medium having stored thereon a plurality of instructions that, when executed by a processor result in...", which is merely software per se.

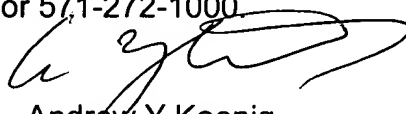

Independent claim 1 recites the method for performing the steps recited in claim 6. Despite being a method (enumerated statutory class) and seemingly a patentable process, it is in reality seeking patent protection of the computer program in the abstract as evidenced by claim 6.
